DF955-U

Fence protection Silver Network Interface Unit (SNIU) - without power supply

Product overview

DF955-U is a Network interface hardware, which converts the physical media of FlexPS network to a standard computer interface (USB, Ethernet, EIA-232). DF955-U (Silver network interface unit) together with DF955-SW (Network manager SW) allow FlexPS processors (DF951) to communicate alarm, status, and configuration information to and from a central control point over a network.

Details

- Provides the choice of USB, Ethernet, or EIA-232 for connecting to the PC
- Pass-through mode supports redundancy
- Integrated lightning protection
