

DR1

DetectaReach® aerosol dispenser

General

The DR1 DetectaReach® is a hand held baton used for testing smoke alarms and fire detectors. When used alongside DetectaSmoke® aerosols, engineers can quickly and effectively test these devices.

Convenient & Re-usable

The can of smoke is stored within the baton. It is safe from being punctured or damaged when transporting.

Once the smoke canister is empty it can simply be unclipped and a new one attached. The plastic baton is not thrown away, reducing costs whilst being kind to the environment.

Operational Advantages

DetectaReach® primary purpose is to provide a suitable distance between the device and the test smoke to avoid overdosing the alarm chamber. When used alongside DetectaSmoke®, engineers can ensure that they are carrying out competent tests with products endorsed by some of the world's leading detector manufacturers.

Every DetectaReach® baton comes with a can of DetectaSmoke® once the smoke runs out then extra cans of the smoke can be purchased.

Detailer

- Re-usable
- Low cost per test
- Storage for the can

Tekniska specifikationer

Fysisk		
Fysiska dimensioner	238 x 75 mm (h x w)	
Nettovikt	214 g	
Färg	Svart	
Miljö		
Vandalsäker	Nej	
Driftstemperatur	≤ 50°C	
Lagringstemperatur	≤ 50°C	
Reglerande		
Undfallenhet	CE, REACH, RoHS 3, WEEE	
SKU info		
Product brand	GasSafe	
Physical		
Aerosol colour	Colourless	
Kompatibla produkter		
Kategori	Referens	Beskrivning
Testutrustning	DS2R
