

Offering your customers optimal support at maximum security

good reasons

for choosing UltraSync™

Smart connection

Seamlessly connecting Aritech solutions to remote applications, offering operational efficiency.

1

Lets you to **easily and quickly install** your security solution.

UltraSync™ lets you easily and quickly establish M2M connections for intelligent edge devices so that the connections are pre-configured before the engineer arrives on site. Plug & Play experience without the need for an in-depth knowledge of IP technology.

2

Ensures an **Ultra-Secure Connection**.

Secured encrypted connectivity with reported quality of service.

3

Supported by different Aritech **connected platforms** and solutions. One UltraSync™ Empowered solution, multiple compatible security platforms: Advisor Advanced, ZeroWire, xGen and NetworX as well as 3th party solutions via the UltraSync UCx40 communicators.

4

Enables a **near real time data** communication. High speed data transfer from one point in a network thanks to a high performing low-latency network.

5

Supported by a wide range of **Central Monitoring Stations (CMS)** throughout EMEA, who are embracing UltraSync™ in their offerings

6

Complies **with data privacy requirements, such as GDPR**.

With UltraSync™, data remains in the local device and no sensitive data is stored in the cloud environment. This keeps the customer in control of their data.

7

Managed through a **powerful and intuitive web portal**.

This UltraSync™ web portal provides you with a user-friendly interface for provisioning, managing, and monitoring UltraSync™ supported devices and enabling services.

8

Provides **remote connectivity and diagnostics**.

UltraSync™ offers security dealers and integrators the option to connect directly to the panels without the need to change customer router settings, firewall rules, or to use Domain Name Service (DNS) to access the systems remotely.

9

Provides you and your customers with a **wide range of communication options** and services over IP, cellular or dual-path over both channels. UltraSync™ supports also the different EN Grades, depending on your security requirements

10

Ensures that your customers can benefit from a **flexible and professional service**, offering them Peace of Mind.
