

AxonTM

Intrusion And Access Control Panel

MORE AT THE CORE

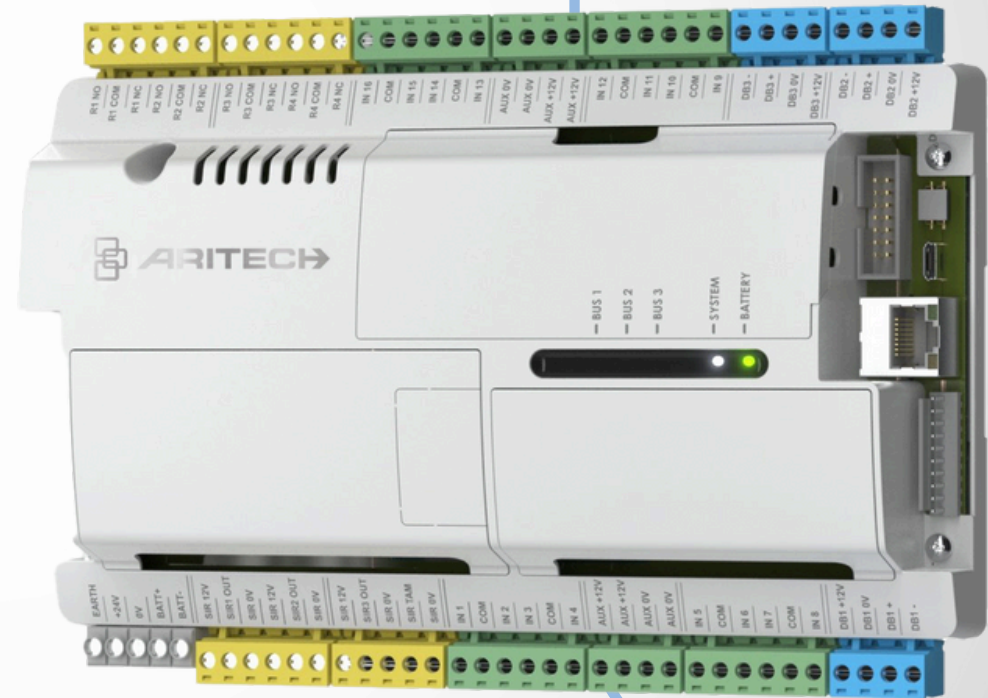

AxonTM, the new integrated security panel from Aritech

An exceptional security platform

Axon gives you more at the core.
Designed and produced in Europe to meet
all your security and access control needs.

The Aritech solution continues to be the obvious choice for addressing our customers' challenges to prevent security threats from becoming incidents.

Backward compatible as standard, Axon was engineered with invaluable insights from our customers, helping us to shape what the future should look like.

The core of our mission has always been to design beyond our present offering with new market leading capability, usability and flexibility.

We proudly present the UltraSync-ready Axon as the only truly integrated intrusion, access control and video surveillance panel to meet our customers' needs worldwide.

Andreas Englund
Axon Product Manager

More at the core

Putting more intuitive, innovative and integrated technology at the core of the Aritech security range.

Integrated Cyber Security

Axon and UltraSync

Exceptional Connectivity Benefits

Axon and UltraSync provide the best duo for an optimized, connected and integrated security system. Together, they bring maximized operational efficiency benefits in integration, automated security, remote maintenance and alarm management.

The Site Manager App for the installer

Register the compatible devices using a QR code in a few simple clicks.

UltraSync Portal for the installer

Controls the installed base remotely.

Device Management

Plug & Play Connectivity

Remote Maintenance

Alarm delivery to CMS as part of the core of UltraSync Core service

EN50136-I/3 end-to-end certified, GDPR compliant, NFA2P level 3 cyber certified. Unique IDs hardcoded to devices. Ultra secure hosting in Europe.

Remote maintenance and support

Easy to troubleshoot, reducing maintenance & support visits, operational costs and overall CO2 footprint.

Cloud applications

Centralized application & database management across installer PC's and enable multi-site management, optimising operational costs.

Integration

Connects intrusion, video & access control. API integration with any type of Aritech device. Integrated video recorders for remote access, updates & diagnostics.

Connectivity

Ethernet, SIM card & automatic VPN connection out of the box, so no need for in-depth IT knowledge. Turnkey approach offers peace of mind and saves time.

Innovative User Experience

Integrated Intrusion and Access control

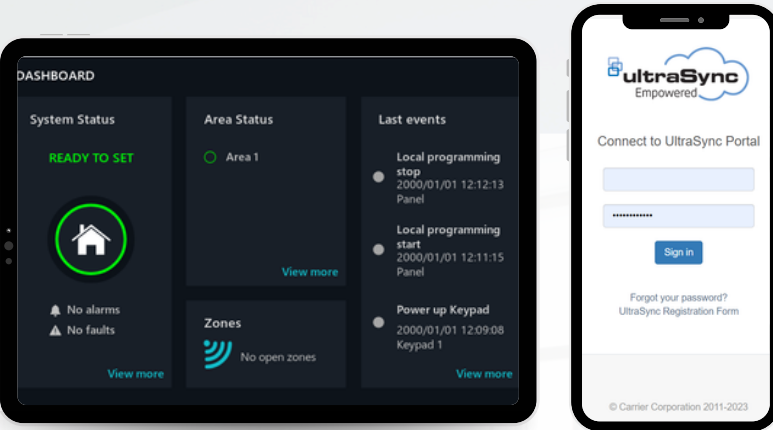

Axon simplifies security and automation with innovative built-in readers.

EFFORTLESS OPERATION

Axon features built-in readers in both the touchscreen and keypad, allowing you to operate the security system with just a badge, simplifying your day-to-day security management.

INTEGRATED CONTROL

With one single action, you can arm or disarm the system, access security controls, or manage other functions like opening doors, garages, or turning on lights — all through a single action.

CUSTOMIZABLE INTEGRATION

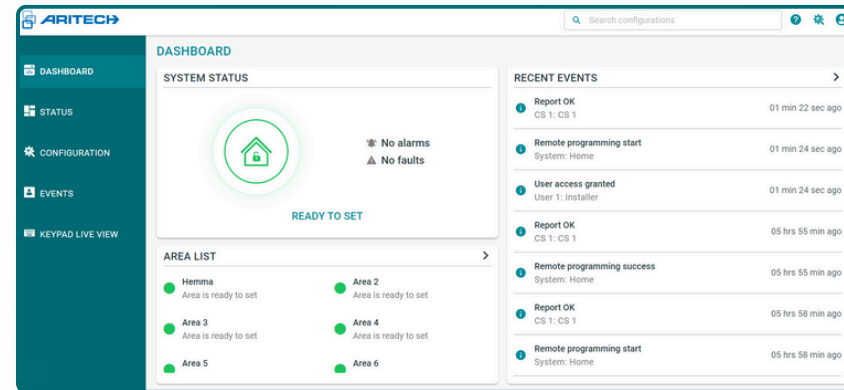

The system's versatility lets installers tailor the integration, giving you the flexibility to control a range of systems and devices, all from one secure interface.

Innovative User Experience

Control Your System On The Go

COMPREHENSIVE MOBILE CONTROL

Our user-friendly mobile app, powered by UltraSync's advanced cybersecurity, lets you control your security system—managing video feeds, access points, and intrusion settings seamlessly from your smartphone. It's an innovative solution for both installers and end-users.

FULL CREDENTIAL MANAGEMENT

Our modern and intuitive web interface allows installers and end users to manage their security systems effortlessly, both locally and remotely, from any PC, smartphone, or tablet — no software needed. Unlike competitors that rely on web portals, our web app offers full credential management directly from your device.

Users can easily create users, update codes, control lights and doors remotely, and view the system status through a clear dashboard, simplifying security management.

Oversee all your systems from a single unified application, anywhere in the world.

Innovative User Experience

Elegant & Intelligent Solutions

THE INTUITIVE TOUCHSCREEN, ATSI40

Our sleek and modern touchscreen device, designed to seamlessly blend into any entrance environment. The ATSI40 not only provides easy access to your security system but also enhances the aesthetic of your space. It's more than just a touchscreen—it's a statement piece for your entrance.

Innovative User Experience

Axon, Easy Security Control

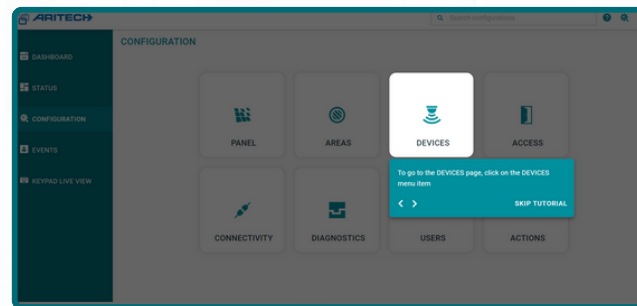

Adapts to your space, fits your style

Axon offers unmatched flexibility, allowing you to customize security.

- Across small, medium, and large installations with ease. Whether you're securing a few zones or an entire facility, our system adapts to your specific needs.
- Choose how you access the system with a variety of options, including badges, cards, readers, or keypads.
- You can even personalize the interface by adding your logo to the keypad or touchscreen, ensuring a security solution that's as unique as your organization.

Guided setup wizard

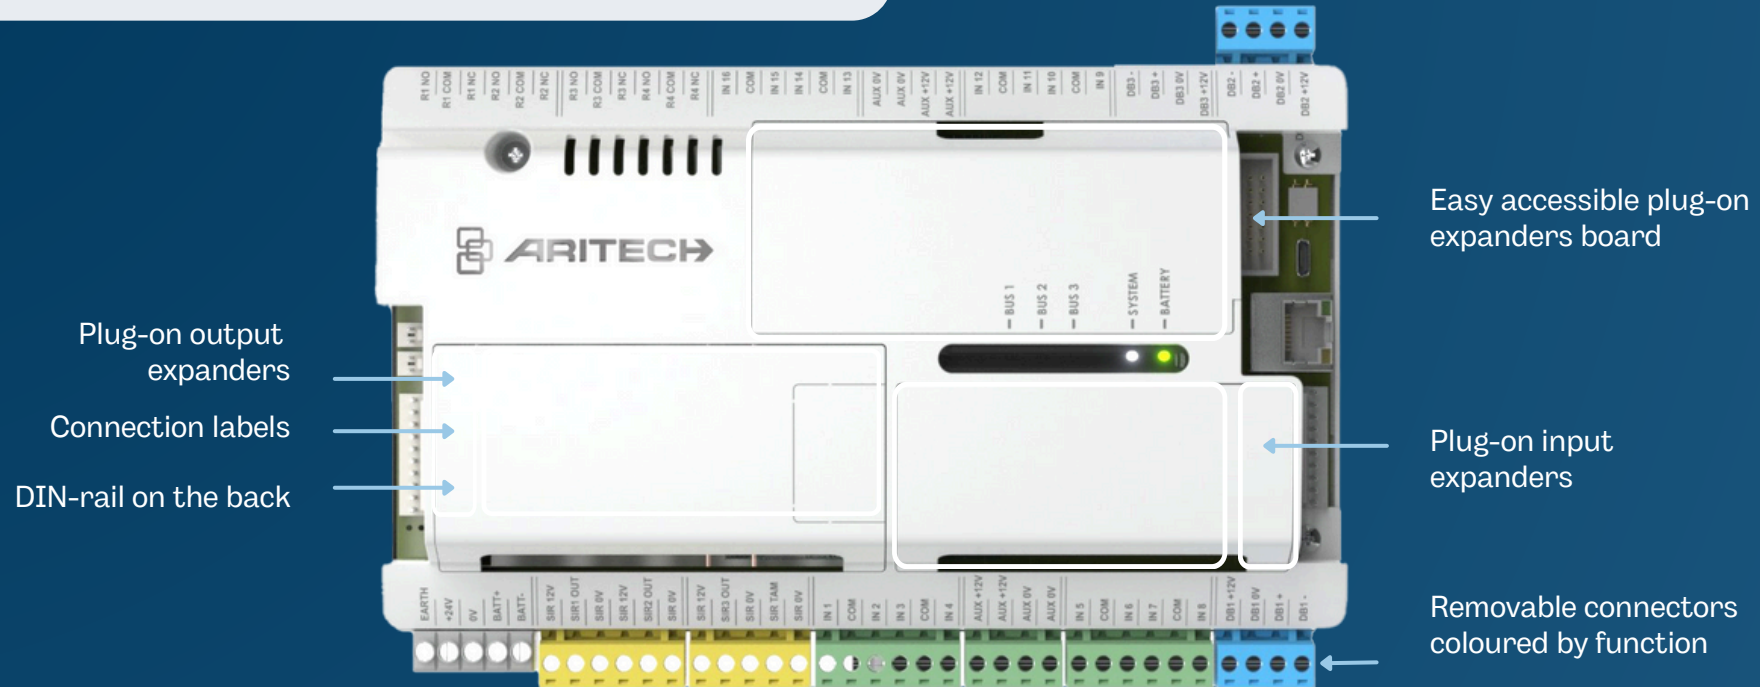

With the built-in web application we offer new on-screen wizard, designed to simplify the configuration process and address feedback from our customers. It provides step-by-step instructions and clear guidance, ensuring that installers can seamlessly set up new devices with ease. process, making it quicker and more intuitive.

By offering on-screen instructions, the wizard supports your existing knowledge and streamlines the configuration process, making it quicker and more intuitive.

Innovative User Experience

Ease of Installation and Maintenance

- New smart configuration wizards with ability to save and replicate.
- Embedded configuration web browser.
- A PSU designed to support more devices in a single system while extending backup battery life, ensuring both efficiency and sustainability.
- Backwards compatible for an easy migration from legacy installations: cost effective and environmentally-friendly solution.
- New APIs for seamless integration with 3rd party systems.
- More efficient remote support through the embedded web server for increased customer satisfaction.
- A future-proof technology with remote firmware updates and built-in speed bus to seamlessly manage images from the wired PIRCAM.

A person with glasses and a beard is sitting at a desk, working on a computer. There are multiple monitors. The top monitors show maps and data visualizations. The bottom monitors show lines of code. The person is typing on a keyboard. The desk has a mug, a notebook, and a file holder.
