

## Always stay ahead of the threat

The new indoor and outdoor sirens from Aritech, certified EN Grade 3 and NFA2P

As sirens are essential signaling devices that alert others in the event of an emergency, we make sure to provide our customers with the best security: our new sirens are designed to meet the highest security standards and are approved for use in Grade 3 and NFA2P security systems.

This makes them a reliable choice for a wide range of environments, from small businesses to light industrial installations.

### What are the benefits for our customers?

Extra secure: tested by accredited laboratories, following strict rules defined and verified by experts. Adapted to the French norms and accepted by insurances.

Versatile: suitable for different environments such as retail, offices, schools and health care; easy to maintain with a battery and power supply monitoring, up to 60 hours of battery autonomy and diagnostic LED for both indoor and outdoor sirens.

Cost effective: reliable security at a competitive price.

### Features

- Battery circuit protection with resettable fuse
- Enhanced tamper protection
- Aritech elegant design
- Self test every 24 hours to check the integrity of the battery and its charging circuit

### Product and battery
