TruVision TVR 46 Firmware 2.3 Release Notes

Introduction

This is the TruVision TVR 46 Firmware 2.3 Release Notes document with additional information not covered in the user manual. For the latest information on the TruVision DVR 46 (TVR 46), please visit:

EMEA: https://firesecurityproducts.com

Australia: https://firesecurityproducts.com.au

Overview

The TVR 46 is a full hybrid recorder that can work with standard analog, HD-TVI and IP cameras. The TVR 46 also features the signature built-in TruVision intrusion integration functionality.

Enhancements

- Support the new TruVision M/P series PTZ IP cameras and the new TruVision S series thermal IP cameras.

- It is now possible to set up the layout for the connected monitors (HDMI1/HDM2/VGA) via the browser.

- The security for the user passwords has increased: passwords need to have a higher complexity and the number of allowed attempts has been reduced to three, before the recorder access is locked for 10 minutes (OSD) or 30 minutes (web).

- Cybersecurity updates

- The player that can be exported from the recorder has been updated to support the recently released TruVision IP cameras.

- The alarm output behavior for Disable Actions can be defined in the webpage.

- The snapshot resolution for snapshots sent via emails has been increased to 4 CIF resolution.
- TLS v.1.2 is used for sending emails.

Limitations

- Upgrading the firmware of the new TruVision M/P series PTZ IP cameras and the new TruVision ANPR IP cameras cannot be done through the recorder as the firmware file of these cameras is too large.

Contacting support

For help installing, operating, maintaining, and troubleshooting this product, refer to this document and any other documentation provided. If you still have questions, contact us during business hours (Monday through Friday, excluding holidays).

Note: Please be ready at the equipment before calling.
