TruVision Navigator 9.2 Release Notes

P/N 1049-EN • REV E • ISS 04JUL23

Introduction

These are the TruVision Navigator 9.2 Release Notes with additional information not covered in the user manual. For the latest information on TruVision Navigator 9.2 go to: https://firesecurityproducts.com/

Overview

This document covers the following:

- Summary of new features and key enhancements
- Summary of bugs fixed
- Summary of limitations

Summary of new features and key enhancements

- Integration of Zenitel Speakers into the TruVision Navigator, allowing user to play pre-configured audio clips directly in the TruVision Navigator.

- Added support for IPv6 enabled recorders/cameras in the TruVision Navigator, with the exception of Notifications (on IPv6 Host) due to firmware limitations.

- Implemented secure SDK communication for enhanced data exchange security.

- Added license plate search functionality for vehicle color using the latest ANPR cameras (i.e., searching existing notifications from the camera's memory).

- Enabled license plate notifications for latest ANPR cameras with an addition of metadata on vehicle color (i.e., live notification when an event occurs on the camera).

- Introduced the ability to upload camera configuration for latest recorders (TVN12) using CSV files from Device Manager.

- Improved Client-Server communication for enhanced security during data transmission.

- Added People Counting capabilities to P-Series cameras that support this feature.

Summary of main bug fixes

N/A

Summary of limitations

- ANPR 3.0 camera is discovered without an HTTPS port, even when HTTPS is enabled on the camera.

- In an IPv6 environment, the Alarm Host does not currently support IPv6 host addresses, resulting in the inability to receive notifications in this environment.

Contacting Support
