EMEA: <https://firesecurityproducts.com>

Australia: <https://firesecurityproducts.com.au/>

The TVE-DEC12 is a video decoder to decode IP streams and show them on an analog or digital video output. Based on an advanced DSP and stable embedded system design, the TruVision video decoder provides high-resolution decoding functionality for live view from TruVision IP cameras, encoders, DVRs and NVRs.

Firmware 1.2.0, build 230926

Date of release: 7th November 2023

Enhancements

- Support for the TruVision P Series IP cameras.

Known issues

- The parameters for the TVE-DEC12 cannot be updated via TruVision Device Manager. That will be fixed in the next version of TruVision Navigator.

Firmware version 1.1.0

Date of release: November 2021

Bug fixes

- This firmware fixes a compatibility issue with decoding the new TruVision S6 v2 IP cameras.
- The web plugin for use with Internet Explorer has new valid certificates.
- This firmware solves an issue with HTTPS that made the decoder unreachable when it was enabled.

Firmware version 1.0i

Date of release: December 2020

New features and enhancements

- Support for multicasting

Bug fixes

- A display issue (image appears too bright) for the VGA monitor output has been solved.

Contacting support

For help installing, operating, maintaining, and troubleshooting this product, refer to this document and any other documentation provided. If you still have questions, contact us during business hours (Monday through Friday, excluding holidays).

Note: Please be ready at the equipment before calling.
