9-10956

Test sampling point assembly - End

Description

The 9-10956 is a test port capillary sampling point for use at the end of a air sampling pipe. It is supplied complete with a 27mm diameter end-cap, to which the flexible sample pipe connects. The flexible sampling pipe has a diameter of 10mm and is 1m long. At the end of the flexible sampling pipe, the test port is connected which can be opened as required to test the system, and measure the transport time.
