N-MC-AFMG-R

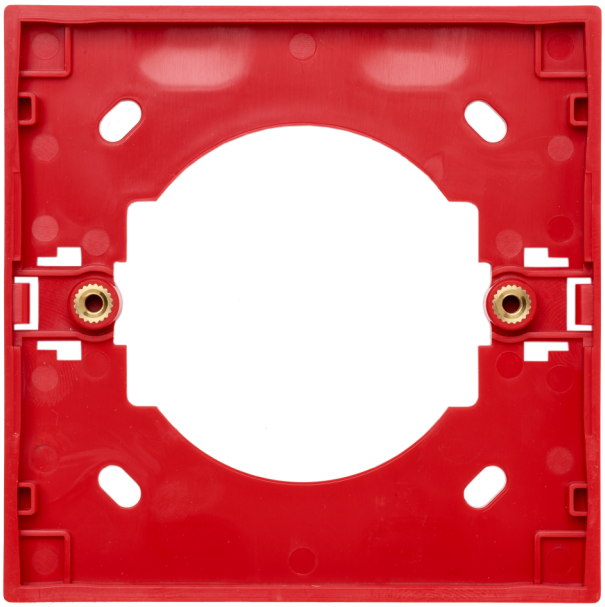

MCP accessory, intelligent flush mount adaptor with screw inserts, red

General

The N-MC-AFMG-R manual call point recess mount accessory allows for mounting Kidde Commercial manual call points on non-standard wall boxes with alternate screw locations. It is particularly useful when the wall box offers no center mounting screw locations on which to fasten the manual call point.

Installation

Using the screw fixture locations provided in various locations on the adapter, the adapter can be easy mounted to non-standard MCP wall boxes. The screw inserts on the adapter in the normal screw location positions allows for the Kidde Commercial manual call point front to be securely affixed to the adapter, with the two parts locking together like a single unit, preserving the overall installation aesthetics.

Details

- Allows for easy manual call point recess mounting on wall boxes without standard mounting screw locations
- Various fitment options allow for installation on most high quality European wall boxes
- Screw inserts facilitate affixing the manual call point front after installation
