ACI406N

Mifare card reader without keypad, with 3 meter cable

Product Overview

The ACI406/407 Mifare readers connect directly on any Wiegand interface of control panels or door controllers. The readers are designed for reliable and secure access control, data collection and people identification in various environments. The Mifare® technology is based upon the ISO 14443 (RFID) Type A 13.56 MHz contact less smart card standard. The technology is embedded in both cards and readers (also referred to as a Proximity Coupling Device).
These innovative products read MIFARE® DESFire UID, MIFARE® Classic UID, MIFARE® Ultralight UID, MIFARE® Plus UID, MIFARE® SmartMX (MIFARE® Classic emulation mode) UID, NFC (UID), Mifare Classic 7 Byte UID

Communication

Readers are suitable for most applications and offer transparent Wiegand communication. Good performance and robustness ensure optimal functionality even in harsh environments.

Design

The unique design of the housing guarantees that the readers can be used in the most demanding surroundings. Readers can be installed directly on to a metal surface without any insulation.
