OH2000E-RO-220
Osborne-Hoffman receiver

Overview

The Osborne-Hoffman receiver OH2000E-RO-220 is a high capacity rack mount receiver able to receive up to 8 add-on cards (PSTN or TCP/IP line cards).

Each new cards can be installed in a few second by opening the front panel and simply sliding the cards in. This can even be done while the receiver is powered.

This receiver supports all common protocol except XSIA, CESA and Telim as input but only supports the proprietary Osborne-Hoffman protocol as automation output.
