

# FE550

## Ventouse de maintien 40Kg, pour porte coupe feu, boîtier métallique

### General

---

The FE550 is a VDS approved door holder in a reinforced plastic box.

### A magnet for all occasions

---

These door holding magnets are the result of years of specialised development. Rated at just 1.5 W @ 24VDC, these powerful magnets pack a holding power of 490 N. All magnets have a spring-loaded pin to ensure ejection against remnant magnetism.

### Application friendly

---

The reinforced plastic box model offers a cost effective solution without sacrificing performance. The FE550 is supplied without a keeper plate. This may be ordered separately depending on the application.

### Installer friendly

---

For practical ease of installation, all units are complete with electrical termination. Protection diodes prevent electromagnetic pulses, and reverse polarity protection speeds up installation. The boxes are predrilled in a practical, standard format for rapid mounting.

### Approvals

---

All models are Vds approved. (Refer to the device specification)

### Détails

---

- Complete range for wall and surface mount
- Low power - 1.5 W
- 490 N holding power on VDS coils
- 100% duty cycle
- Anti-remnant ejector
- Protection diode and reverse polarity protection
- Release button
- Vds approved (see specification)

# FE550

Ventouse de maintien 40Kg, pour porte coupe feu, boîtier métallique

## Spécifications techniques

---

### Général

Bouton de relâche	Oui
-------------------	-----

---

### Électrique

Type de bloc d'alimentation	24 VDC
-----------------------------	--------
