

# GBX70

## Barrière galvanique à 1 canal

#### General

The GBX70 is a galvanic barrier used in 970 series intrinsic safe applications. The GBX70 is used in conjuntion with the PT971 and PT972 protocol translators.

### **Galvanically Isolated Barrier**

The galvanically isolated barrier is a two-wire device that does not need an external power supply. Current drawn from the fire panel loop by the barrier itself is less than 2 mA when loaded as specified. The housing is a rail-mounted type.

This interface is available as a single channel version and is recommended for any application in which direct earth connections are not acceptable.

#### **Function**

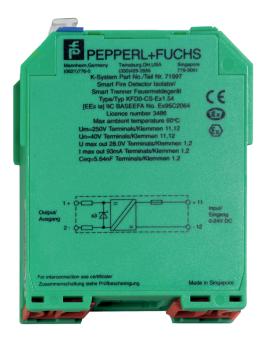

The GBX70 has 4 terminals. The input and output are galvanically isolated from each other. The device is used in order to control SMART compatible fire or smoke detectors in the hazardous area. The power source for the indicators is mounted in the safe area.

The device transfers the voltage to the hazardous area. A response from the indicator is displayed in the case of a current alteration in the safe area.

With the device it is possible to modulate an AC voltage signal upon an analogue signal. A digital data exchange between the devices in the safe area and the hazardous area is then possible parallel to signal transfer. The drop time of the digital signal must be less than 50  $\mu$ s and the current in the hazardous area must be greater than 1 mA.

#### **Application**

The connection of SMART compatible fire and smoke detectors, when a digital data exchange is required.

#### Détails

- Designed especially for use with 970 series systems
- No earthing required
- DIN-Rail mount for easy installation
- For fire alarm in "SMART technology"
- Transmission range: 1 mA ... 20 mA
- Input EEx ia IIC
- Device installation permissible in zone 2
- Loop powered
- EMC acc. to NAMUR NE 21

### Spécifications techniques

Caractéristiques p	hysiques
Dimensions physiques	20 x 107 x 115 mm
Poids net	±100 g
Type de montage	Rail DIN
Environnement	
Température de fonctionnement	-20 to +60°C (Ambient)
Environnement	Intérieur, IS
Indice de protection	IP20
Régulateur	
Certification	CENELEC/ATEX
Inputs/outputs (no	ot intrinsically safe)
Voltage	4 to 26 VDC/0 to 6 Vss AC
Current	1 to 20 mA
Power loss	0.2 W
Inputs/outputs (int	trinsically safe)
Voltage	0 to 26 V for 4 V <= UE <= 26 V: - (0.38 x current in mA) - 0.5 for 4 V <= UE <= 26 V: = UE - (0,38 x current in mA) - 0,5
Short-circuit current	>= 65 mA
Transfer current	0 to 20 mA
Group, category, t	ype of protection
	II (1) G D [EEx ia] IIC (-20°C <= Tamb <= 60°C)
Type of protection	[EEx ia]
Explosion group	IIA IIB IIC
External capacitance	2.14 μF

External inductance

35 mH

17 mH

4.3 mH
