SD2000

2000 Series, Accessory, Sounder Board FP2000

General

The SD2000 is a sounder interface board to connect into the 1200/2000 series fire panels. It provides the panel with 4 supervised outputs dedicated to Sounder, Fire Brigade, Fault Routing and Fire protection control, as well as 4 potential free, change over relays that is freely programmable from the fire panel logic.

One SD2000 is normally pre-fitted in every fire panel (except for the FB2800 black box). Any fire panel can only control one SD2000.

Détails

- Supervised Sounder, Fire Brigade, Fault Routing and Fire Protection outputs
- 4 Potential free, freely programmable relay outputs
- Easy installation
- Automatically configured in the fire panel
