

DC101B

Contact magnétique Aritech, montage en surface, 8", fil en boucle supervisé avec emballage spécial.

DC101-Series

The DC101-Series surface mount magnetic contacts are designed for use in installations where a small, sealed unit is required. The reed switch is totally encapsulated in an exclusive polyurethane potting compound preventing moisture from entering the switch and causing false alarms.

Easy installation

The 16 mm standard gap distance allows for fast, easy installation and prevents false alarms from loose fitting doors. Recessed mounting holes make for clean-looking installations.

High Quality components and materials

Reed legs are plated with rhodium or ruthenium, and hermetically sealed in dry nitrogen. This offers superior protection against sticking and provides a moisture free environment therefore preventing corrosion.

Détails

- Convenient surface mounting
- Standard 2 m wire length
- Tamper loop provided
- Neat and tidy design

DC101B

Contact magnétique Aritech, montage en surface, 8", fil en boucle supervisé avec emballage spécial.

Spécifications techniques

Général

Type d'application	Montage en surface
Type de contact	NC
Connectivité	4 wires, 2 m

Filaire / sans fil

Filaire / sans fil	Câblés
Déficit de fonctionnement	15 mm (max.)

Caractéristiques physiques

Dimensions physiques	51 x 9 x 9 mm
Couleur	Marron

Régulateur

EN50131 Grade	Grade 2
