

VM651P

Kit de fixation amovible jour/nuit pour VV600S3PLUS / VV602S3PLUS / VV700NF.

Movable Mounting Kit

The VM651P movable mounting kit provides extra protection for the door. When mounted, it prevents opening the door when the seismic detector is on the night position plate. Furthermore, it can be wired to inhibit arming of the system when the detector is on the day position plate - thus making it impossible for the staff to forget to shut the door.

VM651P

Kit de fixation amovible jour/nuit pour VV600S3PLUS / VV602S3PLUS / VV700NF.
