

# DB650R

## Base Standard com Duplo Relé - Apollo Série 65 (45681-246)

### General

---

The DB650R is a relay base that provides two volt-free contacts for use in 2 or 4 wire control systems and other applications. It should only be used with the Series 650 wide operating voltage range of detectors. The base incorporates two sets of voltage free contacts that change state when the detector signals an alarm.

### Detalhes

---

- Detector locking mechanism
- One way fit
- Easy to wire
- Contains an earth connector
