

NC700

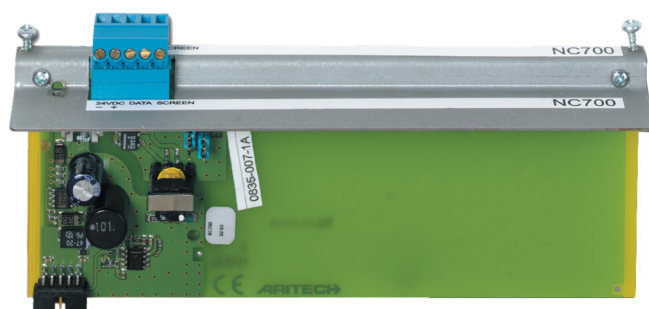

Carta LON 700

General

The NC700 is an interface board to connect a LON700 bus from a fire panel to a FB7xx 'black box' panel. It connects into the rear/back panel bus (bucket) via a standard onboard socket.

Power Options

The NC700 provides facilities for external power to be connected from an external source, or to retrieve power already supplied from the rear panel bus.

Detalhes

- Serial communication network external bus interface
- External or internal power supply
- Fault LED for supply and network line fault supervision
