

AD1000X10

Se AD1000, 10 pkt

The AD1000 IADS module is supported by the ATS1290N DGP, and designed to be installed directly on the terminal block of the following detectors: EV1000 series / VE1000 series / DD1000 series (standard as well as AM variants).

A 3 core connection only is required to the ATS1290N DGP / ATS Master panel.

As the AD1000 acts as I/O interfaces with one dual-zone input and two outputs, it is necessary to program anti-masking detectors to signal a technical fault or antimasking condition to the alarm output.

Detaljer

- Helps reduce installation time
- Up to 32 addresses can be set
- Fits into motion sensor connector block
- Supported by ATS1290N DGP
