COURSES OUTLINE

Access Control and Intrusion

1. TRNG-ATS Advanced (4 days):

Purpose

This technical training is an introduction to the Advisor Advanced control panel. On completing participants will be able to commission and maintain a standard ATS Advanced access and intrusion system. Programming is performed via the keypad and the ATS8500 Downloader software package. Participants will take an exam and receive a certificate.

Products

ATSx500A-(IP) control panel
ATS119x readers + ATS113x keypads
ATS12xx data interfaces
ATS8500 Downloader programming software

Prerequisites

General Knowledge of Alarm and access control systems

2. TRNG-CDC4/ACCIO Access Control (1 day):

Purpose	This technical training is an introduction to access control and the use of the CDC4(-EN) doors/lift controller or the Accio standalone doors/lift controller. After completing this training, participants can independently commission and maintain the controller. The training is intended for technicians who have already completed the Advisor Advanced intrusion and Access training or the TRNG-ATS-Advanced: intrusion & Access training. At the end of this training, participants will take an exam.
Products	CDC4(-EN)/ Accio door controller, ATS118x readers + ATS113x keypads ATS8500, Downloader programming software.
Prerequisites	General Knowledge of Alarm and access control systems.
Note	Available in two options: classroom or online.

3. CCTV and IFS (1 day):

Purpose	This technical training is an introduction to the various TruVision video products and the IP communication surrounding these products. The TruVision recorders and cameras and management software TruVision Navigator with the associated Device Manager. On completion, the technician should be able to independently commission the TruVision IP package.
Products	TruVision recorders, camera's, Navigator and Device manager.
Prerequisites	General knowledge of MS Windows operating systems and IP networks. General experience with configuring video equipment.

4. On Request: TRNG- UC140/UC240 (Online 90 Minutes):

Purpose	General explanation and operation of UCx40 UltraSync Communicator Application, programming and connecting the UCx40 UltraSync Communicator.
Products	UC140/UC240 UltraSync Communicator.
Prerequisites	General Knowledge of Alarm and access control systems

EXAMINATION REGULATION FOR PRODUCT TRAINING

Appendix 1 Examination regulations for product training

General

Delegates that successfully complete an examinable cause will be issued a competency certificate valid for 2 years and delegates that complete a non-examinable cause will be issued certificate of attendance.

Trainings that are completed with an exam are:

- ❖ TRNG-ATS-Advanced: Advisor Advanced, Intrusion, Access control
- ❖ TRNG-CDC4/ACCIO Access control

Examination is approximately 1 hour. All material and software will be provided on a USB Stick and can be used for exams.
